

## Danish Distributor joins Tricool Thermal

Tricool Thermal, experts in the design and manufacture of temperature control equipment are pleased to welcome Ferromatik Danmark A/S as their new Danish distributor.

**FERROMATIK  
DANMARK A/S**

Ferromatik is located in Humlebaek, North of Copenhagen in Denmark. They have been working within the plastics and rubber industry for over 40 years. With a wealth of knowledge and experience they specialise in the injection molding market, providing a vast range of temperature control equipment and services.

Headquarters in Humlebaek

### Experts in the Plastics Market

With their long-term success in the plastics industry, Ferromatik provide a comprehensive approach to their customer's needs; ensuring confidence and a high quality of service. The new distributor will be selling Tricool Thermal's complete range of heating and cooling equipment throughout Denmark. Their dedicated team of experienced personnel cover sales, service and administration with an additional three service technicians who work throughout Denmark in order to provide a competent service and rapid response to all of their customer's requirements.

### Rapidly Growing Network

Ferromatik join Tricool's rapidly growing network of international distributors in France (Farpi and Mac-1), Spain (G.S Tecnic), Israel

(Hor-Tal), Netherlands (Plastima), Sweden (Polytemp), Turkey (Flogaz) and Poland (TransWest).

Danny Yaroslaw, Tricool Thermal's Export Manager is excited to be working alongside Ferromatik's expert sales and servicing team supplying Tricool's large high-tech range of temperature control equipment.

*"A long search has just ended for our Export team. Following discussions with several prospective distributors in Denmark during the last 10 months, we eventually met with a company that has a great mix of experience, product range and enthusiasm to be successful. We are delighted to announce the new appointment of Ferromatik as the latest addition to our distribution team to promote Tricool products into the Danish Plastics industry."*
