

Tricool Thermal FAKUMA Success

Tricool Thermal recently exhibited at the FAKUMA International Trade Fair for plastic processing. The week long show, hosted at the Friedrichshafen Exhibition Centre in Southern Germany saw over 1600 exhibitors come together for Europe's most important plastics trade show of the year.

European Growth

Tricool Thermal's presence at the show marked the first time Tricool Thermal has exhibited outside of the UK as part of the ICS Group of companies. The show also marked the first time Tricool have showcased their improved range of thermoregulators and temperature controllers.

Tricool's export market headed up by Danny Yaroslaw has grown from strength to strength with the appointment of distributors in France, Spain, Germany, Israel, Turkey and Holland. FAKUMA proved a successful base for Tricool as they seek to continue expansion into Europe with further quality distributors for their established range.

Show Success

On the stand Tricool showcased three of their temperature controllers, an oil heater, pressurised water heater and their economic mould temp unit and with expert help on hand no question was left unanswered.

Experience Counts

Tricool Thermal offer a wide range of temperature controllers incorporating oil water and pressurised water heaters.

In addition to their standard range Tricool also manufacture to bespoke specifications for both heating and cooling applications. All of their units are manufactured in the UK at their manufacturing facility in Totton, Southampton to ISO9001 quality controls and ISO14001 environmental controls.
