

## New Polish Distributor for Tricool Thermal

The experienced UK- based temperature control experts, Tricool Thermal are pleased to welcome TransWest to their growing network of international distributors.

### Plastics and Rubber Specialists

Based in the West of Poland, TransWest specialise in plastics and rubber industry requirements working with injection moulding, extrusion and thermoforming applications.

The company began trading in 1992 selling a range of units for shredding plastic and rubber waste. Since then they have significantly expanded to sell a wide range of high quality ancillary parts, fittings, accessories and equipment. With nearly 20 years experience and a dedicated team, TransWest ensure expert quality for their customers.

TransWest's Sales Manager, Michal Sikorski explains why the new arrangement is so beneficial to both companies:

*"We deliver spare parts to different lines of industry, but mainly within plastics and rubber. Therefore, it is essential for us to have a reliable partner to work with."*

*Poland is an interesting market for Tricool's units, so we want to work closely with the UK manufacturer in order to significantly grow sales.*

*We believe our cooperation will bring satisfaction for both sides."*

TransWest will distribute the complete Tricool heater range throughout Poland to their growing customer base.

### A Growing International Network

Tricool's Export Manager, Danny Yaroslaw has been managing the arrangement and is delighted that TransWest will be representing

Tricool's temperature control products throughout Poland. He comments:

*"Our new association with TransWest will provide an increased momentum and drive for the promotion of Tricool as well as a superior service for the Polish plastics and rubber markets. We are looking forward to working alongside TransWest's expert team."*

TransWest joins Tricool's ever growing network of established distributors: Mac Technologie (France) - non plastics, Farpi France (France) - plastics, Hor-Tal (Israel), Polytemp (Sweden), Plastima (Holland), Flogaz (Turkey), GS Tecnic (Spain) and Ferromatik (Denmark).
