

Trade Old for New with the ICS Scrappage Scheme

We want to help you upgrade your temperature control equipment to new energy efficient units.

ICS Industrial Cooling and ICS Tricool Thermal are teaming up to offer you savings of up to **£2000** off the purchase price of a new ICS chiller, heater or temperature controller through the **ICS Scrappage Scheme**, when you trade in your old equipment.

Do you have plans to upgrade?

There has never been a better time to upgrade your cooling or heating system. ICS has a wide range of units capable of reducing your running costs by up to 40% per annum. While Tricool Thermal can offer you close control and temperatures up to 350°C or for specialist bespoke projects, manufacture a unit to meet your exact needs.

Furthermore in upgrading your equipment you may be eligible for a government funded loan from the Carbon Trust, see their website www.carbontrust.co.uk for more details.

How to Qualify:

If you have a chiller, heater or temperature controller that's over 5 years old then you qualify for the **ICS scrappage scheme** and will receive up to **£2,000** when you trade in your existing unit.

It doesn't need to be an ICS chiller or temperature controller that you trade in; it doesn't even need to be working. ICS can visit your site and provide you with a free site survey to recommend the correct chiller for your application. Call us free on **0800 169 3861** for a visit.

Our Experience

We can offer you expertise in sizing and recommending the correct unit for your application, including any additional pumps, water tanks and ancillaries.

With over 35 years experience in the UK, ICS are proud of our reputation and can offer chillers and temperature controllers ex-stock, here in the UK for next day delivery.
