

Tricool Thermal - Taking Europe by Storm

UK-Based temperature control experts Tricool Thermal are pleased to announce the appointment of **Plastima** as its new distributor for mould heaters and temperature controllers to the Benelux plastics market.

Tricool's Benelux Partner

Located on the Netherland, Belgium Boarder, **Plastima** are perfectly situated to serve Benelux. Having served this market for over 50 years they have a wealth of experience and an established customer base in the region. **Plastima** specialise in plastics processing equipment, in particular injection moulding, extrusion, blow moulding and plastic thermoforming.

Having provided advanced, innovative and technical solutions **Plastima** have transformed plastic processes across the country. Their large customer base and 50,000m² site secures them as a key player in the Benelux plastic market, one that Tricool Thermal are pleased to be associated with.

Plastima Head Office

Speaking about the partnership **Danny Yaroslaw**, **Tricool Thermal's Export Manager**, (pictured left),

said: "Tricool Thermal's products have been sold across Europe for many years and we welcome the opportunity to work with **Plastima** to grow business in this important market.

I believe that the combination of Tricool Thermal's high quality products coupled with the dynamic and technically advanced team at **Plastima** will bring added value to our Benelux customers".

Tricool's Growing Network

Plastima join Tricool Thermal's European distribution network as a valued addition to their established partners, **Mac Technologie (France)** - non plastics, **Farpi France (France)** - plastics, **Hor-Tal (Israel)** and **Polytemp (Sweden)**.

Plastima has a team of highly qualified technicians on hand, able to provide advice, assistance and training for any plastics application you may have.

Plastima can be contacted on the details below:

About Tricool Thermal

Tricool Thermal are proud to have been manufacturing precision process temperature control equipment in the UK for over 30 years - and we have built our reputation on this.

We are supported and controlled by our ISO 9001 accreditation within our UK based design, engineering and production facility - to exacting CE standards.

We remain at the forefront of the industry in developing scalable, cost effective 'off the shelf' and bespoke cooling and heating solutions with an operating temperature range of -80 °C to 350 °C.

These industry leading solutions are pushing the boundaries of energy efficiency, flexibility, uptime and process productivity improvements - all contributing to enhanced ongoing operation and cost control for our customers.
