

Tricool Thermal ISO Accreditation

Tricool Thermal has successfully been awarded ISO9001 by ISOQAR.

Tricool Thermal has had a long-standing Quality Management System (QMS) in place which conforms to the requirements of ISO9001:2008 and any related statutory regulatory requirements.

This latest accreditation is under the inspection body ISOQAR who in addition to Tricool Thermal have also awarded ISO9001:2008 to subsequent ICS Divisions including Cool Energy, Service and Industrial Cooling.

The accreditation process has been managed by the ICS Group Quality Manager Keith Holroyd, pictured below.

15 Years of Quality Recognition

Tricool Thermal have successfully been accredited by quality body Bureau Veritas Quality International (BVQI) for the past 15 years. The change of accreditation body has arisen as parent company ICS has looked to develop quality throughout the group to raise the level of quality received by our customers at all stages from design to delivery.

Since March 2008 Tricool Thermals accreditation has been carried out by ISOQAR and covers the design, manufacture, supply and delivery of our Temperature control Packages.

Tricool Thermal's Manufacturing Director, Dave Palmer said "The accreditation gives our customers the confidence that Tricool Thermal works to the highest quality standards and that these standards are frequently monitored."
