

Tricool Thermal Appoint New Turkish Distributor

Tricool Thermal, UK-based manufacturer of temperature control units are pleased to announce the appointment of their new Turkish distributor, Flogaz

Located in Turkey's largest city, Istanbul, Flogaz has over 30 years experience of serving the refrigeration, air conditioning and heating markets. Selling to a wide variety of sectors including agrochemicals, food, paint and ink, cosmetics, industrial chemicals, pharmaceutical and polymer and polyurethane processing, Flogaz provides an ideal selling platform for Tricool's temperature control equipment.

A Perfect Partnership

With a team of over 44 staff and a modern approach to sales and marketing, Flogaz serve the Turkish industry with quality products and a wealth of experience. Tricool have visited Flogaz's site to conduct useful technical and application training to assist their sales team.

Commenting on the partnership, **Danny Yaroslaw, Tricool's Export Manager (pictured right)** said: *"We are extremely pleased to be entering into this new arrangement and eager to continue our growing network in Europe."*

"We look forward to working closely with Flogaz; combining our high quality products with their skilled sales team in order to provide a quality service to the Turkish market".

A Growing European Network

Flogaz joins Tricool's growing European network of distributors including Mac Technologie (France) - non plastics, Farpi France (France) - plastics, Hor-Tal (Israel), Polytemp (Sweden), Plastima (Holland) and GS Tecnic (Spain).

Flogaz has a highly skilled team of engineers and sales staff to provide assistance with your temperature controlled application.
