

Witness Test Your Equipment

Tricool Thermal invite you to witness test your equipment prior to delivery.

Tricool Thermal Manufacturing

Tricool Thermal have been manufacturing chillers and temperature control equipment for more than 30 years. Each unit is built with attention to detail and to ISO 9001 standards.

On Site Testing

Tricool Thermal fully test each unit prior to despatch with their state-of-the-art test rig, pictured below.

Tricool Thermal understand the importance of quality to their customers, which is why all Tricool Thermal customers are invited to witness test their unit prior to delivery.

Tricool Thermal's test rig

Commenting on this facility Dave Palmer, Manufacturing Director said "The ability to invite customers to site to witness test their equipment gives our customers complete peace of mind in the

quality of each unit and the experienced engineering team behind each all of our products.

All testing is carried out on site at our Head Office in Southampton by qualified engineers and we invite customers to visit our manufacturing facility and encourage product testing prior to delivery."

Europe Wide Support

Tricool Thermal are based in Southampton, Hampshire and operate across the UK with further offices in Bradford, Birmingham, Dublin, Glasgow and London.

Tricool Thermal also have operations across Europe in Germany and France.
